THE ANNALS OF APPLIED BIOLOGY

EDITED BY

R. W. MARSH

AND

I. THOMAS

VOLUME 35

CAMBRIDGE
AT THE UNIVERSITY PRESS
1948

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press
(Cambridge, and Bentley House, London)
Agents for U.S.A.: The University of Chicago Press
Canada and India: Macmillan

CONTENTS

No. 1 (March 1948)

PAGE

1. Studies on the relationships between earthworms and soil fertility. II. Some effects of earthworms on soil structure. By A. C. Evans. (With 1 Text-figure) 1

2. Soil conditions and the take-all disease of wheat. IX. Interaction between host plant nutrition, disease escape, and disease resistance. By S. D. Garrett 14

3. The role of antibiotics in the decomposition of sawdust. II. Inhibition of the growth of cellulose-decomposing fungi. By S. E. Jacobs and A. W. Marsden 18

4. The fungistatic activity of ethylenic and acetylenic compounds. I. The effect of the affinity of the substituents for electrons upon the biological activity of ethylenic compounds. By J. C. McGowan, P. W. Brian and H. G. Hemming 25

5. The fungistatic activity of ethylenic and acetylenic compounds. II. Esters of halogenofumaric acids and acetylene dicarboxylic acid. By J. F. Grove 37

6. The relation between the size of plant and the spread of systemic diseases. II. The aphis-borne potato virus diseases. By J. E. van der Plank 45

7. Virus diseases of cacao in West Africa. III. Technique of insect transmission. By A. F. Posnette and A. H. Strickland 53

8. Observations on the development of the cotton boll, with particular reference to changes in susceptibility to pests and diseases. By R. C. Rainey. (With 4 Text-figures) 64

9. Physical factors affecting the toxicity of sprays to stored product insects. I. The quantity of carrier in which a given amount of active ingredient is applied. By P. S. Hewlett 84

10. The effects of D.D.T. and of benzene hexachloride on bees. By M. J. Way and A. D. Synge. (With 3 Text-figures) 94

11. The phytotoxicity of D.D.T. and of benzene hexachloride. By Rosemary I. Stoker. (With Plate 1) 110

12. Tetrazolium salt as a seed germination indicator. By Helen J. Cottrell. (With 2 Text-figures) 123

13. Proceedings of the Association of Applied Biologists: 5 December 1947:

1. Oil seed crops in Great Britain. By E. S. Bunting . . 132
2. Control of weeds in oil seed crops. By K. Holly . . . 133
3. Insect pests of *Brassica* seed crops in Romney Marsh, Kent. By S. G. Jary and K. Carpenter 134

14. Reviews 137

No. 2 (June 1948)

PAGE

1. The toxic action of molybdenum in relation to soils and crops. By Winifred E. Brenchley. (With Plate 2) 139

2. Problems in the cultivation of winter lettuce. By W. Brown and N. Montgomery 161

3. Studies on the relationship between earthworms and soil fertility. III. The effect of soil type on the structure of earthworm population. By W. J. McL. Guild 181

4. Wireworm populations in relation to crop production. V. Comparisons between failing and successful plots. By D. M. Ross, J. H. Stapley and G. F. Cockbill. (With 1 Text-figure) 193

5. The use of metaldehyde against slugs. By D. C. Thomas. (With 7 Text-figures) 207

6. The formation of insecticidal films on building materials. III. Supplementary laboratory tests on size and gelatin as pretreatments. By P. S. Hewlett 228

7. D.D.T. impregnation of sacks for the protection of stored cereals against insect infestation. By E. A. Parkin. (With Plate 3 and 1 Text-figure) 233

8. *Verticillium* wilt of the hop (*Humulus lupulus*). III. A study of the pathogenicity of isolates from fluctuating and from progressive outbreaks. By I. Isaac and W. G. Keyworth. (With Plate 4) 243

9. Studies on the importance and control of potato virus *X*. By F. C. Bawden, B. Kassanis and F. M. Roberts. (With Plate 5) . . . 250

10. Experiments on the spread of potato virus *X* between plants in contact. By F. M. Roberts 266

11. Resolution of strawberry virus complexes. II. Virus 2 (mild yellow-edge virus). By Ian W. Prentice. (With Plate 6) 279

12. Some notes on *Holcus mollis* L. By E. Wyllie Fenton . . . 290

13. Obituary Notice. Robert Stewart MacDougall 293

14. Proceedings of the Association of Applied Biologists: Annual General Meeting, 20 February 1948:

    1. Stored-product pests: a survey of the principal entomological problems in the United Kingdom. By J. A. Freeman . . . 294

    2. Stored-product pests: a survey of methods of control in the United Kingdom since 1939. By E. E. Turtle 302

15. Report of the Council of the Association of Applied Biologists for the year 1947 307

16. Plant Pests and Diseases Committee Report for 1947 . . . 308

17. Hon. Editor's Report for 1947 309

18. Report of the Honorary Treasurer for the year ended 31 December 1947 309

19. Reviews 311

20. Accounts 313

No. 3 (September 1948)

PAGE

1. The penetration of 3:5-dinitro-*o*-cresol into leaves. By G. E. Fogg. (With 1 Text-figure) 315

2. The persistence of hydrogen cyanide in rabbit burrows. By H. N. Southern. (With 9 Text-figures) 331

3. Statistical aspects of the independent joint action of poisons, particularly insecticides. I. The toxicity of a mixture of poisons. By R. L. Plackett and P. S. Hewlett. (With 5 Text-figures) 347

4. A spinning-disk sprayer for applying residual insecticides. By H. C. M. Parr and J. R. Busvine. (With 5 Text-figures) 359

5. Pasture improvement and the control of sheep tick (*Ixodes ricinus* L.) By A. Milne 369

6. Aphis migration and the efficiency of the trapping method. By L. Broadbent. (With 5 Text-figures) 379

7. Experiments on the spread of rugose mosaic and leaf roll in potato crops in 1946. By L. Broadbent and P. H. Gregory. (With 5 Text-figures) 395

8. The effect of roguing on the spread of virus diseases in potatoes at Rothamsted in 1946. By P. H. Gregory. (With 2 Text-figures) . . 406

9. The multiple-infection transformation. By P. H. Gregory. (With 1 Text-figure) 412

10. Photosynthesis and predisposition of plants to infection with certain viruses. By F. C. Bawden and F. M. Roberts 418

11. A study of the longevity of the seed-borne parasites of flax in relation to the storage of the seed. By J. Colhoun and A. E. Muskett. (With 1 Text-figure) 429

12. Soil conditions and the take-all disease of wheat. X. Control of the disease under continuous cultivation of a spring-sown cereal. By S. D. Garrett and Harold H. Mann 435

13. Studies in plant nutrition. I. The effect of some organic supplements on the growth of lettuce in sand culture. By C. G. C. Chesters and H. E. Street. (With 2 Text-figures) 443

14. Proceedings of the Association of Applied Biologists: 23 April 1948. Symposium on wool research:

The organization of wool research. By R. J. Bray . . . 460

The organization of wool education. By P. A. Wells . . . 463

Some problems of wool growth. By A. B. Wildman . . . 466

The protection of wool against attack by insect pests. By J. Barritt and R. S. Hartley 467

No. 4 (December 1948)

PAGE

1. Studies on the relationships between earthworms and soil fertility. IV. On the life cycles of some British Lumbricidae. By A. C. Evans and W. J. McL. Guild. (With 6 Text-figures) 471

2. Studies on the relationships between earthworms and soil fertility. V. Field populations. By A. C. Evans and W. J. McL. Guild. (With 4 Text-figures) 485

3. Persistence of D.D.T. and benzene hexachloride in soils. By M. S. Smith. (With 1 Text-figure) 494

4. The contact toxicity of a number of D.D.T. analogues and of four isomers of benzene hexachloride to *Macrosiphoniella sanborni* and *Oryzaephilus surinamensis*. By K. A. Lord. (With 7 Text-figures) . . . 505

5. Relation between bioassay systems and the values found for toxicity of D.D.T. By A. Stringer 527

6. The toxicity of vapours to the grain weevil. By J. Ferguson and H. Pirie. (With 3 Text-figures) 532

7. Methods of recording aphid populations for use in research on potato virus diseases. By L. Broadbent. (With 8 Text-figures) 551

8. On estimating the population of aphids in a potato field. By F. J. Anscombe 567

9. Studies on *Bacterium fascians*. V. Further observations on the pathological and physiological reactions of *Bact. fascians*. By Margaret S. Lacey. (With 4 Text-figures) 572

10. Varietal resistance of flax to disease. By John Colhoun . . . 582

11. Observations on a virus disease of certain crucifers in Trinidad. By W. T. Dale. (With Plate 7) 598

12. Studies in the diagnosis of mineral deficiency. IV. The mineral content of barley plants in relation to potassium deficiency. By D. W. Goodall. (With 4 Text-figures) 605

13. Growth cycle metabolism of plants in relation to flowering. By John Grainger. (With 7 Text-figures) 624

14. Nitrogen content in relation to fungal growth in apples. By John Colhoun. (With 3 Text-figures) 638

15. Proceedings of the Association of Applied Biologists: 23 July 1948. Conversazione on recent advances in applied entomology, mycology and plant pathology. List of exhibits 648

16. Reviews 651
